- Milan Endpoint Firmware v1.4.0 - updated for this release
- Bluehorn 816 Firmware v2.7.0 - updated for this release
- CAL Firmware v2.2.0

> **NOTE:** If upgrading CAL from firmware version 1.5.0 or earlier, please contact Technical Support for specific instructions.

NEW FEATURES

- 2100-LFC Product Integration

UPDATES / FIXES

- Improved IEEE 1722.1 compliance
- Milan Endpoint connection improvements
- Improved behavior of Milan Endpoints with third-party controllers
- Milan stream counter improvements
- Various bug fixes

KNOWN ISSUES

- A small percentage of loudspeakers equipped with RMS modules will not retain their user-entered loudspeaker name when the "Discover All Loudspeakers" button in the Compass Monitoring tab is clicked or the "Discover Inventory" option is selected from the contextual menu in the Compass Monitoring tab. This issue is related to Echelon hardware and is not able to be fixed as we have received the last available Echelon components.
