CueStation 5.5.6.2

Meyer Sound®

OPERATING SYSTEM COMPATIBILITY

This version is compatible with macOS 14 (Sonoma) and Windows 11 Professional, 64-bit.

UPDATES AND FIXES

- When triggering the command *Create Virtual Drive File* from a Sub-Cue, the Wild Tracks sub-routine no longer crashes, the command now responds the same as the *Create Virtual Drive File* button in the Wild Tracks Drive Setup Dialog.

- When a Cue List includes "Trigger == Time Code" and several Master Time Clock updates include the trigger time code value, the Cue now executes only once, instead of twice.
